Public infrastructure initiatives in Greece

Identifying investment
opportunities and facilitating
access to financing

Providing end-to-end legal and strategic support in public procurement, concessions & PPP projects, while unlocking financing instruments and investment opportunities.

Greek & European law ensure that public procurement is conducted transparently, preventing fraud, waste, corruption, and local protectionism. Concessions and Public-Private Partnership (PPP) projects require minimal state contribution, making public tenders particularly attractive for large-scale infrastructure projects. Greece's development is closely linked to the successful completion of critical infrastructure and strategic investment projects - from energy and transportation to ports, healthcare, and water resources. **We guide clients with professionalism and integrity through every project, not just as advisors but as true partners in success:** from project preparation and tender submissions to negotiations, contract signing, and project execution. At the same time, we leverage the financing tools and incentives provided by Greek legislation - including the NSRF, the Recovery and Resilience Fund, Strategic Investments legislation, and the Development Law - to secure the optimal investment framework for every project.

Partner with us for compliant, efficient, and strategic procurement solutions - leveraging the right financing tools for every project.
